

Assumption:

1. For the same (consultantId, teamId) pair, assignment periods do not overlap.
2. For the same (teamId, regionId) pair, assignment periods do not overlap.
3. Each call_log record is associated with exactly one consultant and exactly one team. Monthly call statistics are derived from call_log rather than stored as a separate entity.

Travel Consulting company ERD

DVD rental company ERD

- Assumptions:
1. Each staff member works at exactly one branch at a time, and each branch has exactly one manager at a given time.
 2. The manager of a branch must be a staff member who belongs to the same branch.
 3. A member is able to rent DVDs up to a maximum of ten at any one time.
 4. The dvd_rental entity does not redundantly store the movie title or the member's full name. Instead, movie title can be obtained by joining dvd_rental -> dvd_copy -> movie, and the member's full name can be obtained by joining dvd_rental -> member.
